Company Profile

Allwyn Corporation, founded in 2003, is a woman-owned and minority-owned business. Our mission is to help companies solve complex technology problems by bringing tools, technologies, experienced resources, processes, methodologies, and project delivery expertise to the table. Our goal is to enable our clients to stay competitive in the global marketplace by helping them implement high quality and cost-efficient software and IT applications.

Service Offerings

Our team has an established track record of performing risk assessments, penetration and vulnerability tests, capability assessments, controls assessments, and controls testing. We frequently implement server, application, and network security policies and procedures and help our customers achieve **Fedramp, NIST CSF, NIST RMF, ATO** compliance. We have **CISA and CISSP resources** that can ensure the achievement of your cybersecurity goals.

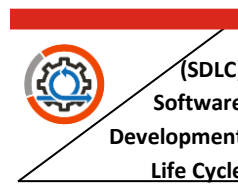

We solve high-stakes complex business problems using the power of Artificial Intelligence (AI) and **machine learning** algorithms. Using state-of-art technologies like **big data analytics**, supervised and unsupervised learning techniques we accelerate business performance and implement innovative applications.

Our team of **Amazon Certified Cloud Practitioners** has a track record of implementing security compliance, Accreditation and Authorization of Cloud based Applications. We also offer complete **cloud migration planning** and implementation services to provide scalability, cost efficiency and modernization of infrastructure. Our strategy includes migration of applications and data accelerating business agility.

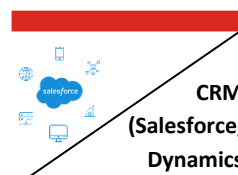

At Allwyn, we offer our clients our complete business intelligence which includes **mobile analytics dashboard apps**, customization, D3 visualizations, **predictive analytics**, data discovery transformation, database and performance tuning, **big data strategy** and implementation, and financial reporting.

We will help you through the entire **Agile lifecycle** process, from requirements through production support. Our technical capabilities include several **cloud-based custom software solutions** that are used in both private and government sectors. We have also implemented **SDP (Solutions Development Process)** and **SELC (Systems Engineering Life Cycle)** processes while working with DHS.

We offer a complete project/program management approach that includes proper planning of all approved costs, schedules, and risks. Our project management technique also provides our clients with performance updates to assess product progress and issues. We use iterative **program performance analysis** and measurement techniques to effectively **forecast and improve control over financial performance and resource utilization**.

We offer our expertise to design and implement innovative solutions using the **Salesforce cloud, Appian** and **Microsoft Dynamics 365**. We help our customers engage better with their prospects, customers and partners.
